Summary of Representation.—Orders have been issued for the levy from the land revenue payers only of an education cess of six pies or one anna per rupee of assessment. In the majority of cases, it is the children of the tradesmen and people in Government employment and those of the mohatarfa payers that are benefited more by education than the children of the raiyats paying land revenue to Government. The levy of the cess on the latter class alone is not therefore justifiable. It should be levied on all classes alike.
